Technical Datasheet

Analysis Name: Ash Determination

Method Number: LI-00.565

Scope of Application: This method applies to a wide range of raw materials, finished products, and gummy-based vitamins.

Description: The sample is dried and then incinerated to destroy organic matter. The ash content is determined gravimetrically on the residue.

Sample Weight Required: 25 g

Method Reference: AACC(1995) "Ash- Basic method"
AOAC International method 945.46 (33.2.10)
AOAC International method 920.153 (39.1.09)
ISO/DIS 936, ISO 2171: 1993

Analytical Platform: Gravimetric

Analyte Reported	Alias	Unit of Measure	Limit of Quantification	Reproducibility
Ash		%	0.05	0.20
