Technical Datasheet

Analysis Name: Citric Acid Enzymatic Determination in Juice Concentrates and Juice Purees

Method Number: NQA-06.8107

Scope of Application: Determination of Citric acid in juice concentrates, juice purees, juice pulps and other similar products.

Description: Rapid determination of citric acid in juice concentrates and juice purees via enzyme addition and detection by spectrophotometric absorbance.

Sample Weight Required: 50 g

Analytical Platform: UV-Spectrophotometer

Analyte Reported	Alias	Unit of Measure	Limit of Quantification	Reproducibility
Citric Acid		mg/100 g	2	10%
