

NUTRITIONAL LABELING

Maintain compliance for your products and consumer confidence in your brand.

We perform testing to ensure accurate labeling for products and to ensure compliance to the 2020 FDA regulations for Food Labeling. Our nutritional and functional ingredient testing ensures accurate product labeling to support both Nutritional Facts Panel (NFP) regulations as well as additional label claims.

In May 2016, the FDA announced changes to labeling requirements that will require food and beverage manufacturers to update their nutrition fact label and associated claims.

These required updates include:

- Increased, bolded type sizes for “calories” and “serving size”
- Inclusion of “added sugars” in grams and percent daily value
- Required inclusion of potassium and Vitamin D

We understand providing safe, quality food to consumers is your top priority and a accurate nutritional information is critical.

Contact us at 614.526.5200 or nqacdublininfo@us.nestle.com to get started!

ISO 17025 Accredited

We receive, test and report seven days a week.
