Technical Datasheet

Analysis Name: Coffee Brew Standard

Method Number: Coffee Brew Standard

Scope of Application: Coffee Brews

Description: Coffee Grounds and/or Pods may be submitted for in-house brew prior to analytical testing.

Sample Weight Minimum:
Required: 45g per Brew (for Drip Machines)
Brews + 1 (for Pods)
Recommended:
85g per Brew (for Drip Machines)
Brews X 2 (for Pods)

Analytical Platform: Sample Prep

Special Information: Customer must populate special instructions to indicate brewer and number of brews. Standard brewing parameters are stated in the table below.

Brewed coffee may be stored up to 5 days for analysis. If deviations vs stated metrics are necessary, be sure to expand special instructions to add this clarity. Prices may fluctuate based on difficulty.

Brewer	Number of Brews	Volume of Water (or Final Brew Weight)	Weight of Ground Coffee
Drip Machine	1-5	720 mL	40 g
Keurig	1-5	8 oz	N/A
Other	1-5	Specify in Special Instruction	N/A
