# Technical Datasheet

**Analysis Name:** Pesticide Residue Analysis by Electrospray LC-MS/MS

**Method Number:** NQA-54.0003

**Scope of Application:** This method is not suitable to determine black pepper, clove, cumin seed, ginger extract, ginger powder, rosemary, ground rosemary, white pepper, peppercorn, nutmeg, and oleoresin

**Description:** QuEChERS is an extraction method for the analysis of pesticide residues in a large variety of food products. The extracts obtained by this procedure are analyzed by Electrospray ionization LC-MS/MS

**Sample Weight Required:** 50 g

**Method Reference:** Determination of pesticide residues using GC-MS and/or LC-MS/MS following acetonitrile extraction/partitioning and cleanup by dispersive SPE-QuEChERS-method. EN 15662, November 2008.

*FDA Pesticide Analytical Manual Volume I.*

Guidance document on analytical quality control and validation procedures for pesticide residues analysis in food and feed. SANTE/11945/2015.

**Analytical Platform:** LC/MS/MS

**Special Information:** *QL may vary based on matrix effects*

*Some pesticides may be reported as "Not Determinable" if interferences or matrix effects prevent detection/quantitation*
