Technical Datasheet

Analysis Name: Non Protein Nitrogen

Method Number: LI-00.561

Scope of Application: This method is applicable to milk and milk products containing milk proteins or products containing protein hydrolysates such as hypoallergenic infant formulas and certain products for clinical nutrition.

Description: This is a method for the quantitative determination of non-protein nitrogen (NPN) in milk and products containing milk proteins by Kjeldahl using a block digestion apparatus and automated steam distillation unit.

Sample Weight Required: 25 g

Method Reference: ISO 8968-4:2001 /IDF 20-4: 2001. Milk-Determination of nitrogen content. Part 4: Determination of non-protein nitrogen content.

Analytical Platform: Protein by Kjeldahl

Special Information: Must be run with Protein by Kjeldahl (LI-00.556)

This method is not accredited to ISO 17025. Validation data & measurement uncertainty may not be available. To request the analysis, please contact US: NQAC Customer Service for current cost and estimated Turn-Around-Time. Please be aware that TAT may change after submission due to supply chain and/or operational variables.
